I spoke too early, I do need the TCDD TEQ values for RM 7-8 in the western nearshore zone.

Good morning Kristine. I'm on a conference call right now but will get back to you with an answer later today. Jim.

Jim – I notice that TCDD TEQ in the tables is a subheading to PCDD/Fs. Does this mean that for this section of the RI only the pentachloro congeners were converted to TCDD or is it just a misnomer and all the dioxin/furan congeners were converted to TCDD TEQ using appropriate TEFs (as was done in both baseline risk assessments)?
